

Alpha ProTech has you covered with WRB System Components & Temporary Roof Protection

REXTREME® Flashing - Enhance the quality and durability of your construction projects by choosing a premium, self-adhering butyl flashing that fulfills all requirements for AAMA 711 Level 3, ensuring top-tier performance and advanced features.

Key Features:

- Minimum Application Temp: 18° F
- 180-Day UV Exposure
- AAMA 711 Certified

REXTREME Flex Flashing - A high strength PET film designed for the toughest conditions with great cold and warm weather applications.

Key Features:

- Can be used in connection with most sealants & self-seal around fasteners
- 90° conformity and sealing properties on window jambs

REXTM Royal Seam Tape is a high strength PET film designed for the toughest conditions with great cold and warm weather applications.

Key Features:

- Formulated with a "quick tack" adhesive to speed installation
- Easy quick tear edges
- 3" wide versus standard 2" wide tapes

Temporary Roof Protection

REXTM StormRoof Wrap offers many advantages over the old blue tarps when temporary roof protection is needed.
