

Alpha ProTech has you covered with a comprehensive line of mechanically fastened and self-adhered roof underlayments.

TECHNO SB® ULTRA offers a Limited Lifetime warranty as a mechanically fastened roof underlayment suitable for a variety of roof coverings like concrete, metal, and tile. Enhanced with AQUA TRAK® technology for superior traction in wet conditions, it also provides outstanding 6-month UV protection, delivering peace of mind for imported roof products.

TECHNO SB® 50 is the ultimate option for prioritizing protection. With a 50-year warranty and 6-month UV protection, rest assured you're safeguarded against the toughest conditions. Suitable for various roof coverings like concrete, metal, and tile, our AQUA TRAK® technology ensures exceptional traction in wet environments, making sure you're covered, right from installation.

TECHNO SB® 25 is the only choice in new construction when quality and safety matter. Our 25-year warranty and 6-month UV protection are complemented by our exceptional tear strengths and versatility. Feel confident installing concrete, metal and tile on steep pitched roofs because our AQUA TRAK® technology provides maximum traction, even in wet environments.

All TECHNO SB® Products are:

TECHNOplus®

TECHNOplus® Ice & Water Barrier is a high-quality self-adhered granular underlayment designed for use in both new construction and re-roofing projects. This premium product is specifically recommended for providing protection in valleys and preventing ice dams along the roof's leading edge. TECHNOplus® can be left exposed for up to 30 days and meets all ASTM D-1970 compliance standards.
