WEATHER-RESISTIVE BARRIERS

Alpha ProTech has you covered with a comprehensive line of woven & non-woven weather-resistive barriers

REX WRAP® & REX WRAP PLUS®

Whether you're constructing a new home or enhancing an existing one, REX Wrap® or REX Wrap Plus® is your go-to solution. Its woven design ensures durability, while micro-perforations allow for breathability. They are constructed of surfactant-resistant materials which ensures durability across a wide range of materials.

REX™ WRAP ROYAL

The perfect choice for demanding applications that require robust protection against severe weather conditions. Constructed from surfactant-resistant materials, it is ideal for use on wood, vinyl, metal, brick, stone, cement siding, or stucco.

REX™ FORTIS LOW-P & REX™ FORTIS HIGH-P

The ideal option for demanding applications that require protection from severe weather conditions and environments. They are constructed of surfactant-resistant materials, making them suitable for use on wood, vinyl, metal, brick, stone, cement siding, stucco, or EIFS. They are approved for single-family residences and commercial properties up to 4 stories.

REX™ FORTIS COMMERICAL

Delivers unmatched performance and protection for the demanding applications of 5+ story construction. Its surfactant-resistant construction makes it suitable for wood, vinyl, metal, brick, stone, cement siding, stucco, or EIFS.
